21st Century Skills: Interpreting the new Partnership for the 21st Century skills and the National Standards. \* MediaShare increases out-of-class talk time by allowing language learners to create and to post video assignments, role-plays, group projects, and more in a variety of formats including video, Word, PowerPoint, and Excel. (The preterite is now introduced in Chapter 5, which means instructors can now introduce students to the past tense in the first semester of the course.) \* A wealth of online tools provide students with options for out-of-class communicative practice include LiveChat, a pair/group video recording tool, MediaShare, a video sharing site, and WeSpeke, the virtual chat tool with native speakers. \* LiveChat offers synchronous audio and video recording capability, so instructors can easily facilitate oral practice outside the classroom. New activities written especially for ¡Anda! online are language-controlled and offer a process approach to help students understand and gain insight into the countries they are studying. \* A new Lectura section introduces students to reading through various styles that are familiar to them like social media and blogs. Chapters 6 and 12 are recycling chapters. A final assessment in each chapter (Y por fin, ¿cómo andas?) offers a comprehensive review and ties to the Learning Outcomes at the beginning of each chapter. Others offer learning strategies (Estrategia) and additional information (Fíjate). ¡Anda! online offers students a wealth of online resources and a supportive environment for completing homework assignments. The inductive presentations are accompanied by an Explicalo tú heading and an icon that directs them to Appendix 1 where answers to the questions in the presentations may be found. Note: Additional information that instructors may wish to share with students beyond what is presented in the text. In addition to a reasonable basic vocabulary load selected and tested through ¡Anda! development for its relevance and support, additional words and phrases are offered so that students can personalize their responses and acquire the vocabulary that is most meaningful to them. Included in ¡Anda! online, this interactive classroom tool uses students' smartphones, tablets, and laptops to engage them in sophisticated tasks and thinking in the classroom. Savvas Learning Company is a trademark of Savvas Learning Company LLC. They then must formulate the rule(s) through the use of guiding questions. \* Additional Activity: Independent activities related to the ones in the text that provide further practice than those supplied in the text. Practice activities follow each presentation so that students get immediate practice on a manageable amount of material. Hints, verb charts, a glossary, and many other resources are available as well. Instructor teaching support One of the most important keys to student success is instructor success. Alternate Activity: Variations of activities provided to suit each individual classroom and preferences. Instructors can assign speaking activities that motivate learners to demonstrate their ability to engage in conversation in Spanish with other students in the class. Eventually, we are exhausted and have to stop. Planning Ahead: Suggestions for instructors included in the chapter openers to help prepare materials in advance for certain activities in the chapter. New online resources in MySpanishLab — such as tools that enable students to practice Spanish with native speakers from around the world and engaging video content that offers insights into Spanish-speaking cultures — further help facilitate meaningful learning experiences within and outside the classroom. Los cursos en línea de Alison ® son la forma más asequible y flexible de aprender y adquirir nuevas habilidades al tiempo que obtienen certificados y títulos valiosos, de forma gratuita. Integrated video-capture functionality allows learners and instructors to record video directly from a webcam, smartphone or tablet using the MediaShare app and easily upload their assignment. Realistic goals are the first step in achieving success! A Realistic Assessment of the 4-Semester Sequence. ¡Anda! is the first college-level Spanish program conceived from the outset as a two-year sequence of materials. The ten regular chapters are complemented by two preliminary chapters and two recycling chapters. They provide clear expectations for students as they review. One of the hallmarks of the ¡Anda! program is the transparent and comprehensive recycling system that helps students link current learning to previously studied materials in earlier chapters or sections. \* Revised Scope and Sequence creates a better balance between semesters and across the 2-year ¡Anda! program. The annotations are color-coded and labeled for ready reference and ease of use. \* A treasure trove of supplemental activities, available for download in ¡Anda! online, allows instructors to choose additional materials for in-class use. \* The teacher annotations in the ¡Anda! program fall into several categories: Methodology: A deep and broad set of methods notes designed for the novice instructor. New activity types including LiveChat, drag-and-drop, and more help students to engage in homework to improve preparedness for class. \* The Testing Program had been revised to reflect the goals of the ¡Anda! program. Expansion: Ideas for variations of a topic that may serve as wrap-up activities. \* Grammar tutorials and vocabulary flashcards are now mobile and ready for study on the go with new apps for smartphones. Rubrics have been provided for these chapters to assess student performance. \* Periodic review and self-assessment boxes (¿Cómo andas?) Click on a series title to see the full list of products in the series. Additional vocabulary items are found in Vocabulario útil boxes throughout the chapters as well as in Appendix 3 (También se dice). The second preliminary chapter, for the beginning of the second semester, is to help students remember what they learned in the first semester or to help those students who placed into second semester by giving them a catch-up or review. \* No assumptions are made concerning previous experience with Spanish or with language learning in general. \* ¿Cómo andas I? help students gauge their understanding and retention of the material presented. Explanations take both an inductive and deductive approach. Connect with us to learn more. But we can walk almost endlessly, fun fact. These are also tied to the ¿Cómo andas? \* Many NEW teacher annotations (Lectura, Club cultura, Expansion, Suggestion, Note, and Planning Ahead) have been added to provide additional guidance and options for instructors and to aid in lesson planning and implementation for the new sections of the program. \* Learning Catalytics™, offers instructors an easy way to implement peer-to-peer learning in class, and track student performance through real-time analytics. Not more or less than is needed. No new material is presented. \* Preparación y práctica activities for each vocabulary and grammar chunk in ¡Anda! online give students quick comprehension practice before they come to class to communicate. No new material is presented in these chapters. \* A vocabulary digital zoom tool in ¡Anda! online allows students to zoom in and hear vocabulary words as they learn outside of class helping them to quickly assimilate meanings and pronunciation. \* Chapter openers now provide a warm-up to the chapter and facilitate class discussion through three captioned photos, newly-written introductions, and a ¿Sabías qué? Practice then progresses through more meaningful, structured activities in which the student is guided but has some flexibility in determining the appropriate response, and ends with communicative activities in which students are manipulating language to create personalized responses. For those grammar explanations that are easier for students to learn, the more direct deductive approach is used. \* Online Preparación y práctica activities give students the comprehension practice they need before coming to class to actively participate in pair and group work. Capítulo 6 recycles materials from Capítulo A through Capítulo 5 and Capítulo 12 recycles material from Capítulo 7 through Capítulo 11. These skills enumerate what is necessary for successful 21st century citizens. Learners "see" who in their class is available to speak, engage in an online video and audio chat, and record their conversation. Suggestion: Teaching tips that provide ideas that will help with the implementation of activities and sections. Virtually all of the in-class practice activities are pair and group activities, thereby ensuring students spend their class time speaking. The answers students are able to provide do indeed require higher-order thinking, but at a linguistic level completely appropriate for a beginning language learner. \* With regard to Other Subject Areas, ¡Anda! is diligent with regard to incorporating Connections to other disciplines via vocabulary, discussion topics, and suggested activities. It is actually amazing how far we can go when we walk, ultimately much farther than when we run. \* Vocabulary and Grammar Presented in Manageable Chunks: \* Vocabulary and grammar are presented in manageable amounts, or small chunks. However, note that there is a realistic approach to the activity sequence; not all activities are open-ended (more demanding), but rather practice begins with the online Preparación y práctica comprehension activities, followed in class by more mechanical exercises, for which there are correct answers. They are encouraged to think critically about these cultural practices and gifts to society. \* Transparent recycling throughout the program. Throughout the program, explicit and transparent recycling reminds students where they can review previous grammar topics. So if you're tired of dashing through Elementary and Intermediate Spanish without giving students a chance to practice what they're learning, walk with ¡Anda! This product is part of the following series. Icons indicate this, and give a reference to the student of exactly where the recycled concept is referenced earlier in the text. When enabled by the instructor, extra resources appear at the point-of-need to support students as they complete online homework activities; providing links to English and Spanish grammar tutorials, eText sections, and additional practice activities—all directly relevant to the task at hand. ¡Anda! is designed to be ready to go! Its innovations center around four key areas: realistic goals with a realistic approach, increasing student talk time inside and outside the classroom, a focus on student motivation, and tools to promote success. \* Realistic Goals. Descubra los mejores cursos en línea en Alison ®. \* In collaboration with WeSpeke, chapter-specific activities enable students to practice new language "live" with native speakers of their choosing from around the world. The integrated video-capture functionality allows learners and instructors to record video directly from a webcam, smartphone or tablet using the MediaShare app and easily upload their assignment. The focus is on motivating students to succeed by ensuring that students have all they need to understand. \* Special Recycling Chapters. \* Learning Outcomes in the chapter openers focus students on what they will be able to do successfully by the end of each chapter. Designed for in-class use, these chapters recycle and recombine previously presented vocabulary, grammar, and culture, giving students more time to practice communication without the burden of learning new grammar or vocabulary. Readiness Checks in ¡Anda! online check for student understanding of English grammar concepts to ensure that they understand the language of language learning. They are less timid when speaking with each other rather than in front of the whole class. New rubrics have been provided in these chapters to assess student performance. The ¡Anda! program was designed to give students more opportunities to pause and take a breath to take in all that makes up the exciting Spanish-speaking world. Research is conclusive that students learn best from other students. Research has shown that the inductive method enables students to better remember and internalize the rules. \* An icon in the vocabulary presentations links to the También se dice... Appendix from the eText for additional personalization of vocabulary. Follow-up: Suggestions to aid instructors in assessing student comprehension. With ¡Anda!, the goal is for students to speak 20-30 minutes per class period. \* Both "high" and "popular" culture are
